

Hydropolis 2020

Water sensitive stormwater is BAU – what is next for WA?

1 & 2 April 2020

Department of Water and Environmental Regulation, Davidson Terrace, Joondalup

SPONSORSHIP PACKAGES

Hydropolis in 2020 will bring together guest speakers and delegates from some of the leading management, planning and infrastructure organisations to exchange ideas and information that will assist in the implementation of the WA Government’s Waterwise Perth Action Plan, including mechanisms to encourage new developments, including those in infill areas, to be waterwise and document the characteristics of ‘good-practice’ waterwise urban development.

Although water sensitive stormwater is considered to be largely business as usual in new development, there are continued challenges facing our communities and infrastructure as we plan for growth. This conference will help us to refocus and consider new ways we can contribute to a waterwise future for Perth.

The Conference will be spread over two full days, including presentations and research papers from a wide range of community and industry spokespeople, plus a workshop on the Stormwater Management Manual.

We invite you to maximise your visibility to key target markets by becoming a 2020 Hydropolis sponsor.

Our marketing will ensure that your support and profile is raised with our membership and the profession as a whole, increasing brand loyalty, strengthening your market position by creating awareness, building strong business relationships and is excellent value for money.

The Hydropolis conferences have attracted delegates from across the globe, covering a wide range of water Professionals, including:

- Engineers
- Environmental Scientists
- Planners
- Researchers
- Local and State Government Agencies
- Policy Makers
- Academics
- Students

We look forward to partnering with you, please choose from one of our sponsorship packages outlined or [contact SWA](#) today to review your participation.
